SERIES NOTE

Current Bibliographies in Medicine (CBM) is a continuation in part of the National Library of Medicine's Literature Search Series, which ceased in 1987 with No. 87-15. In 1989 it also subsumed the *Specialized Bibliography Series*. Each bibliography in the new series covers a distinct subject area of biomedicine and is intended to fulfill a current awareness function. Citations are usually derived from searching a variety of online databases. NLM databases utilized include MEDLINE®, AVLINE®, BIOETHICSLINE®, CANCERLIT®, CATLINE®, HEALTH, POPLINE™ and TOXLINE®. The only criterion for the inclusion of a particular published work is its relevance to the topic being presented; the format, ownership, or location of the material is not considered.

Comments and suggestions on this series may be addressed to:

Ordering Information:

Current Bibliographies in Medicine is sold by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. To order the entire CBM series for the calendar year 1991 (20 bibliographies), send \$52.00 (\$65.00 foreign) to the Superintendent of Documents citing GPO List ID: CBM91. For your convenience an order blank is given inside the back cover. Orders for individual bibliographies in the series (\$3.00, \$3.75 foreign) should be sent to the Superintendent of Documents citing the title, CBM number, and the GPO List ID given above.

Use of funds for printing this periodical has been approved by the Director of the Office of Management and Budget through September 30, 1992.

REGIONAL MEDICAL PROGRAMS

The Regional Medical Programs were first conceived in the report of the President's Commission on Heart Disease, Cancer and Stroke, chaired by Dr. Michael E. DeBakey. The report, entitled "A National Program to Conquer Heart Disease, Cancer, and Stroke" (Dec. 1964), recommended the institution of regional cooperative arrangements to make the latest advances from biomedical research available to benefit the health of the American people.

In October 1965, President Johnson signed the Heart Disease, Cancer and Stroke Amendments (Public Law 89-239) that authorized the establishment and maintenance of Regional Medical Programs. The purpose of this amendment to the Public Health Service Act was "to encourage and assist in the establishment of regional cooperative arrangements among medical schools, research institutions, and hospitals for research and training (including continuing education) and for related demonstration of patient care..." (Sec. 900, PL 89-239).

Ultimately, 56 regions were established, covering the nation, including Alaska, Hawaii, and Puerto Rico. Regions were multi-state, individual states, or portions of states; some overlapped, depending on local decision-making at their creation. Most programs were located at or near university medical schools. Accomplishments in each region varied as much as the regions themselves, and in many cases were never written up and published.

This bibliography was prepared in support of the National Library of Medicine conference titled "Regional Medical Programs: Legislation and Activities in the U.S. (1965-1976)," held in Bethesda, Maryland, on December 6, 1991. The bibliography includes all items that could be identified; citations are representative of the types of material written about the Programs, and include journal articles, monographs, meeting abstracts, reports, and dissertations from 1964 to 1977. Materials are organized into four categories: general citations about Regional Medical Programs; projects under Regional Medical Programs; library and information services sponsored by Regional Medical Programs; and dial access tape libraries supported by Regional Medical Programs. A citation may appear in more than one category.

SEARCH STRATEGY

A variety of online databases are usually searched in preparing bibliographies in the CBM series. To assist you in updating or otherwise manipulating the material in this search, the strategy used for the NLM's MEDLINE database is given below. Please note that the search strategies presented here differ from individual demand searches in that they are generally broadly formulated and irrelevant citations edited out prior to printing.

SS 1 = REGIONAL MEDICAL PROGRAMS

SS 2 = (TF) REGIONAL AND MEDICAL AND ALL PROGRAM:

SS 3 = 1 OR 2

SS 4 = UNITED STATES

SS 5 = 3 AND 4

GRATEFUL MED®

To make online searching easier and more efficient, the Library offers GRATEFUL MED, microcomputer-based software that provides a user-friendly interface to most NLM databases. This software was specifically developed for health professionals and features multiple choice menus and "fill in the blank" screens for easy search preparation. GRATEFUL MED runs on an IBM PC (or IBM-compatible) with DOS 2.0 or a Macintosh, and requires a Hayes (or Hayes-compatible) modem. It may be purchased from the National Technical Information Service in Springfield, Virginia, for \$29.95 (plus \$3.00 per order for shipping). For your convenience, an order blank has been enclosed at the back of this bibliography.

SAMPLE CITATIONS

Citations in this bibliographic series are formatted according to the rules established for *Index Medicus**. Sample journal and monograph citations appear below. For journal articles written in a foreign language, the English translation of the title is placed in brackets; for monographs, the title is given in the original language. In both cases the language of publication is shown by a three letter abbreviation appearing at the end of the citation. Note also that a colon (:) may appear within an author's name or article title. The NLM computer system automatically inserts this symbol in the place of a diacritical mark.

Order Form

GRATEFUL MED[®] Software For Macintosh & IBM

Please send me _____
copies of GRATEFUL
MED for the
Macintosh.
Order No. PB89-
196083/GBB at \$29.95
each.

Please send me _____
copies of GRATEFUL
MED for IBM and
compatibles.
Order No. PB86-
158482/GBB at \$29.95
each.

Total **Mac** versions _____ + Total **IBM** versions _____ +
Handling \$3.00 + Billing Fee* _____ = Total _____
* Add \$7.50 Billing Fee if using a Purchase Order.
Please attach this form to any purchase order you use.
P.O. #: _____

Enclosed is check / money order payable to NTIS for
\$ _____.

Charge to (check one):

American Express VISA MasterCard

Card Number _____ Exp. _____

Signature (required to validate order):

Send to:

U.S. Department of Commerce
National Technical Information Service
5285 Port Royal Rd.
Springfield, VA 22161

Telephone: (703) 487-4650

For ordering by FAX: (703) 321-8547

(only for orders using credit card or purchase order)

Please complete the following.

Last Name: _____ First Initial: _____

Title: _____

Company / Organization: _____

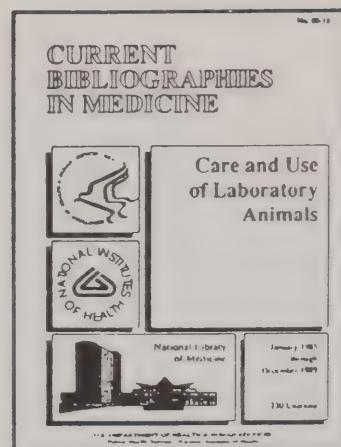

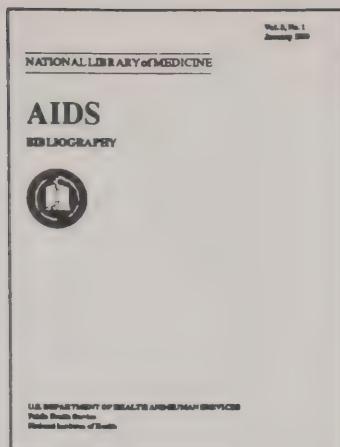

Address: _____

City / State / Zip: _____

Phone Number: () _____

*In addition to your order you will receive free yearly upgrades of the software and information
on obtaining a user code required to access the National Library of Medicine's datafiles.*

National Library of Medicine Reference Bibliography Series

AIDS Bibliography *
\$59 per year (12 Monthly issues)
Individual issues \$5 per copy
List ID: AID91

Previously published quarterly.
Each issue consists of about 700-900 recent references to journal articles, books, and audiovisuals on AIDS.

Current Bibliographies in Medicine *
\$52 per year (Approx. 20 Titles/yr.)
Individual issues \$3 per copy
List ID: CBM91

A continuation of the Library's Literature Search Series, which ended in 1987. Topics will continue to be chosen for their current popular interest in distinct subject areas of biomedicine (excluding AIDS).

*Subscribers receive all issues for a given calendar year without regard to the date of order.

Superintendent of Documents Subscriptions Order Form

Order Processing Code **6999**

*

YES, please send me the subscription(s) indicated above.

The total cost of my order is \$ _____ . Prices include regular domestic postage and handling and are subject to change. International customers please add 25%.
